

NIMRA NAVEED

MERN Stack Developer

Lahore, Pakistan | +923274330304 | nimranaveed351@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Motivated MERN Stack Developer with hands-on experience building full-stack web applications using React, Node.js, Express, and MongoDB. Skilled in developing responsive UIs, RESTful APIs, and secure authentication systems. Contributed frontend development to SmartBI, a business intelligence tool, as part of a final-year project. Passionate about clean code, scalable architecture and continuous learning.

TECHNICAL SKILLS

Languages	JavaScript, HTML5, CSS3, Tailwind CSS, C++
Frameworks	React.js, Node.js, Express.js
Database	MongoDB
Tools & IDEs	VS Code, GitHub
Concepts	Data Structures, REST APIs, JWT Authentication, State Management

WORK EXPERIENCE

Al Burraq Technologies – Software Development Intern

20 august 2026 – current

- Currently undergoing hands-on training in JavaScript and React.js, focusing on building interactive and responsive web interfaces.
- Developing practical understanding of React components, state management, and modern JavaScript concepts through project-based learning.
- Applying frontend development practices to build reusable UI components and improve problem-solving skills.

DevWeekend Fellowship

June 2025 – September 2025

- Completed a hands-on software development fellowship focused on practical, project-based learning.
- Built MERN stack projects as part of the fellowship curriculum, applying React, Node.js, Express, and MongoDB.
- Practiced problem-solving on LeetCode to strengthen data structures and algorithms skills.

Amazon E-commerce – Product Research & Operations

December 2025 – May 2026

Tools: Keepa, Seller Assistant, Seller AMP

- Conducted product hunting and sourcing to identify profitable opportunities for the store.
- Managed profit analysis to evaluate margins and support sourcing decisions.
- Handled end-to-end order management and order tracking to ensure smooth fulfillment.

PROJECTS

1. SmartBI – Business Intelligence Tool (Final Year Project)

Tech Stack: React.js, Tailwind CSS, REST APIs

- Contributed as the Frontend Developer for SmartBI, a full-featured business intelligence platform built as a final year project.
- Designed and developed a clean, responsive dashboard UI using React.js and Tailwind CSS, enabling users to visualize and interact with business data.
- Integrated REST APIs with the backend to display real-time reports, charts, and analytics.
- Focused on component modularity, performance optimization, and smooth user experience.

2. Doctor Appointment Booking App

Tech Stack: *React.js, Node.js/Express, MongoDB, Tailwind CSS*

- Built a full-stack doctor appointment platform with categorized specializations (e.g., Cardiologist, Dermatologist, General Physician) for easy doctor discovery.
- Implemented availability-based slot booking where patients can view and book open time slots according to each doctor's schedule.
- Developed a doctor self-registration flow allowing doctors to create profiles, set their specialization, and manage their availability.
- Integrated a payment method for secure appointment fee collection during the booking process.

3. Grocery Store Application

Tech Stack: *Next.js, React, Node.js/Express, MongoDB*

- Created a full-featured grocery shopping app with product catalog, cart management, and checkout flow.
- Used real-time state management for cart updates and reusable UI components for maintainability.

4. MERN Authentication System

Tech Stack: *Next.js, React, Node.js/Express, MongoDB*

- Implemented secure authentication with JWT tokens, bcrypt password encryption, and protected routes.
- Built user-friendly login and registration workflows with a responsive dashboard.

EDUCATION

Bachelor of Science in Computer Science | Sep 2022 – May 2026

University of Education, Lahore

- Coursework: Data Structures, Algorithms, Web Development, Database Systems, Software Engineering.
